

WNYRIC Network Diagram - Current	
TITLE:	High Level - Current
ISSUE:	1.2
DATE:	10/20/2014

This design is a small subset of reality, from the Regional HUB down it is replicated for the number of school districts in that particular region. At the District level, the intra-district sites are all connected with 1GB links back to the main District building. All BOCES are treated the same as all other Districts.

This depiction would be replicated across all 5 Regions.
